

All registered users are expected to maintain high standards for the accuracy and timeliness of documents filed via CM/ECF; and the Clerk's Office continues to assist registered CM/ECF users in maintaining the integrity of the docket.

The Clerk's Office has determined that the CM/ECF noticing system, and standards of practice among registered users, have improved to the point where it is no longer necessary for the Clerk to take an active role in monitoring certain filing events. Please note the following changes in Quality Control activities and adjust your practice accordingly:

- **Proof of Claim Filed by Registered Users: We will no longer review claims for any deficiencies, and leave it to the parties and case trustee to review the claims register to determine the validity of the claims filed in the case.**
- **Notice of Appearance and Creditor Request for Notice: Our QC practice is limited to matching the PDF caption to the case in which the document is filed. We will no longer ensure that a filer has updated the matrix with a new address via creditor maintenance.**

Please direct any questions to the CM/ECF help desk.
